Submitted by:
Bacister, Camille Grace
Lenon, Mikaela Jun
Ubias, Zachary James

In partial fulfillment of academic requirements
for the course
CS 191 Software Engineering I
of the
1st Semester, AY 2015-2016

Unique Reference:

The documents are stored in the https://github.com/Zhalen/event-sharing-app

https://github.com/Zhalen/event-sharing-app/blob/master/02-Requirements%20Engineering/10%20-%20Report_Event.pdf

Document Purpose:

The purpose of this document is to give a clear understanding on how the use-case Report_Event works for different possible alternative flows there are.

Target Audience:

This documents aim to target possible users of the project, the client, and developers interested in making a project similar to this.

Revision Control

History Revision:

| Revision Date	Person Responsible	Version Number	Modification
09/16/15	Camille Bacister	1.0	Initial Document; Flow of Events
09/16/15	Mika Lenon	1.1	Added and updated flow of events, and other conditions
09/16/15	Zachary Ubias	2.1	Created activity diagram
09/28/15	Zachary Ubias	2.2	Changed use-case numbering (Numberings moved with respect to the removal of the 'Create account' use case).

Use-Case Name: 9.0 Report Event

Description: The user can report suspicious published events. There is a chance that an event owner might use false information to make the administrator approve his post. A solution for a situation like this is to add a functionality of Report Event under the users.

Preconditions: None

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) Submit action	1. The user opt to report wrong events or events with invalid information. 2. The user submits the action to the system. 3. The user will wait for the administrator's verification before the event gets deleted.
Scenario 2 Discard action	1. The user opt to report wrong events or events with invalid information. 2. The user opt not to confirm the action.

Activity Diagram of the Flow of Events:

Report Event	
User	**Interface**

User:
- (start)
- Identify event entry to report
- Select 'report event' option
- Input report reason and submit to admin for veification
- (end)

Interface:
- Display report event prompt

Postcondition: *Event is now queued for inspection by the administrator.*

Relationships: *NONE*

Special Requirements: NONE
